- Production Sessions: 19
- Technical Papers: 173

### Quotes

#### **SIGGRAPH 2014 Conference Chair, Dave Shreiner**

*"We've made much more of this year's content available throughout the conference week. The 'creative' venues specifically — Art Gallery, Emerging Technologies, and Studio — are available to more registration categories for 2014. Everyone knows SIGGRAPH for its technical content and amazing eye candy, but these venues help showcase the interactive experiences of SIGGRAPH."*

#### **SIGGRAPH 2014 Computer Animation Festival Director, Jerome Solomon**

*"Each piece that is in the Festival is truly something special on its own merit. There's no other stage in the world comparable to SIGGRAPH's Computer Animation Festival and this year we have added more [awards] categories, which only enriches the diversity and richness of the show."*

#### **SIGGRAPH 2014 Production Sessions Chair, Roy C. Anthony**

*"The 2014 Production Sessions lineup is packed with powerful content and truly showcases an amazing conglomerate of the best creative minds in the business. It's not often that industry professionals and students alike can come together and learn from CG and VFX experts of this caliber."*
